EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Frame on Friday, June 24, 2005.

IN THE CLAIMS

Please amend claim 48-49 without prejudice or disclaimer.

Please amend claims 48-49 as follow:

48. (CURRENTLY AMENDED) A computer readable storage medium for handling packets, the computer readable storage medium comprising code operable to:

- receive instructions from a service manager;
- process packets according to the instructions;
- forward selected packets from a forwarding agent to the service manager, wherein the forwarding agent and the service manager are configured on a single network device such that one or more packets may be exchanged between the forwarding agent and the service manager within the network device, and wherein the single network device includes an additional forwarding agent and an additional service manager and the single network device is coupled to one or more servers that are operable to satisfy a request generated by one or more clients that are coupled to a network disposed

between the clients and the single network device, and wherein a portion of traffic generated by the clients, which is destined for one or more of the servers, is handled by the forwarding agent and another portion of the traffic is handled by the additional forwarding agent;

receive packet handling instructions from the service manager at the forwarding agent that include the actions determined by the service manager for the packet;

receive a subsequent packet at the forwarding agent;

determine that the subsequent packet matches a criteria included in the packet handling instructions; and

handle the subsequent packet at the forwarding agent according to the packet handling instructions, wherein the instructions provided by the service manager are associated with a selected one of a group consisting of:

a routing operation',

a load balancing operation',

a packet modification operation;

a tunneling operation; and

a tag switching operation.

49. (CURRENTLY AMENDED) A computer readable storage medium for providing a network service, the computer readable storage medium comprising code operable to: receive packet interest instructions from a service manager, the instructions specifying

Art Unit: 2157

one or more packets that a forwarding agent is to communicate to the service manager, wherein the forwarding agent and the service manager are configured on a single network device such that one or more packets may be exchanged between the forwarding agent and the service manager within the network device, and wherein the single network device includes an additional forwarding agent and an additional service manager and the single network device is coupled to one or more servers that are operable to satisfy a request generated by one or more clients that are coupled to a network disposed between the clients and the single network device, and wherein a portion of traffic generated by the clients, which is destined for one or more of the servers, is handled by the forwarding agent and another portion of the traffic is handled by the additional forwarding agent;

receive an initial packet that matches one of the packets specified in the packet interest instructions from the service manager;

communicate the initial packet to the service manager so that the packet may be processed at the service manager to determine one or more actions that are to be performed for the packet;

receive packet handling instructions from the service manager at the forwarding agent that include the actions determined by the service manager for the packet;

receive a subsequent packet at the forwarding agent;

determine that the subsequent packet matches a criteria included in the packet handling instructions; and

handle the subsequent packet at the forwarding agent according to the packet handling

instructions, wherein the instructions provided by the service manager are associated with a selected one of a group consisting of:

- a routing operation;
- a load balancing operation;
- a packet modification operation;
- a tunneling operation; and
- a tag switching operation.

Reason For Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or suggest the single network device including an additional forwarding agent and an additional service manager and wherein a portion of traffic is handled by the forwarding agent and another portion of the traffic is handled by the additional forwarding agent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-88 are allowed.
